

IN THE CLAIMS

1-85 (Canceled)

86. (Currently amended) A method of treatment of a disorder of the central nervous system of a human patient, selected from the group consisting of seizure disorders, vascular disorders, degenerative disorders and immune disorders, other than a brain tumor, comprising:

localizing the disorder to the brainstem and limbic system of said patient;
administering one or more drugs to said patient that block calcium intake channels of body cells, substantially like nimodipine and felodipine;

administering one or more drugs to said patient that aid in inhibition of neural activity in the brain, substantially like gabatril and tigabine hydrochloride, together with an anti-epileptic drug to increase sensitivity of receptor neuron complexes; and

monitoring said patient's response.

87. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one anti-viral drug.

88. (Previously presented) The method of claim 86 further comprising:

administering to said patient at least one anti-fungal drug.

89. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one antibiotic drug.

90. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one substance that provides immune
system equilibrium.

91. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one drug that inhibits body actions
that lead to blood clotting.

92. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one drug that acts as a chelating agent.

93. (Previously presented) The method of claim 86 further comprising:
administering to said patient at least one drug that acts so as to relieve at
least one symptom of psychosis.

94. (Currently amended) A method of treatment of a disorder of the
brainstem of a patient, selected from the group consisting of seizure disorders,
vascular disorders, degenerative disorders and immune disorders, which also

involves a disorder of at least one other part of the patient's body comprising:

administration of one or more drugs to said patient that act so as to block the calcium intake channels of body cells, substantially like nimodipine and felodipine;

administering one or more drugs to said patient that aid in inhibition of neural activity in the brain, substantially like gabatril and tigabine hydrochloride, together with an anti-epileptic drug to increase sensitivity of receptor neuron complexes; and

administration to said patient of at least one substance that acts to provide immune system equilibrium to the body.

95. (Previously presented) The method of claim 94 further comprising: administration to said patient at least one antiviral drug.

96. (Previously presented) The method of claim 94 further comprising: administration to said patient at least one anti-fungal drug.

97. (Previously presented) The method of claim 94 further comprising: administration to said patient at least one antibiotic drug.

98. (Previously presented) The method of claim 94 further comprising:

administration to said patient at least one drug that acts so as to inhibit body actions that lead to blood clotting.

99. (Previously presented) The method of claim 94 further comprising: administration to said patient at least one drug that acts as a chelating agent so as to remove toxic substances from the human body.

100. (Currently amended) The method of claim 94 further comprising: administration to said patient of growth hormone [or a growth hormone releasing substance].

101. (Presently amended) The method of claim 94 further comprising: administration to said patient of oxygen that will reach the arterial blood and other structures of the patient.

102. (Previously presented) The method of claim 94 further comprising: administration of modalities and drugs that treat parts of the human body other than the brainstem.

103. (Previously presented) The method of claim 94 further comprising: administration to said patient at least one drug that acts so as to relieve at least one symptom of psychosis.

104. (Previously presented) The method of claim 94 further comprising:
monitoring the treatment process with suitable clinical examination and
laboratory tests.
